

EURASTiP – Promoting Multi-Stakeholder Contributions to International Cooperation on Sustainable Solutions for Aquaculture Development in South-East Asia

RESEARCH CAPACITY BUILDING EXCHANGE PROGRAMME GUIDELINES

Introduction

Promoting Multi-Stakeholder Contributions to International Cooperation on Sustainable Solutions for Aquaculture Development in south-east Asia — EURASTiP, is a three-year Coordination and Support Action, funded through the EU Horizon 2020 programme, and developed in response to the EU call “reinforcing international cooperation on sustainable aquaculture production with countries from South East Asia” (H2020 SFS-24-2016). EURASTiP will provide a structured basis for multi-stakeholder dialogue in the aquaculture community, within south-east Asia and between south-east Asia and Europe. For the purposes of the EURASTiP project, the geographical region “south-east Asia” extends to include Bangladesh.

To maximise collaboration and strategic partnerships, EURASTiP will implement **Exchange Programmes** between Europe and south-east Asia in the field of sustainable aquaculture for three different types of stakeholders: **educators**, **researchers** and **industry stakeholders**. The overall aim of each of the three Exchange Programmes is to develop strategic partnerships, increase collaboration and learn from each other.

The **research capacity building exchanges** focus on sharing knowledge and research experience between European & south-east Asia. Not only research institutes and universities are welcome to apply, also the aquaculture industry is encouraged to take part in these research capacity exchanges as leading applicant and/or as a host.

EURASTiP engages in an equal opportunities and diversity policy and encourages everyone to apply regardless of race, age and gender.

What?

A researcher or industry representative from Europe works for two weeks on a research topic in a research institute (or in a company with a research department) in south-east Asia.

AND/OR

A researcher or industry representative from south-east Asia works for two weeks on a research topic in a research institute (or in a company with a research department) in Europe.

The exchanges can be two-way or one-way, however the total amount of exchanges funded by the project will be equally divided between Europe and south-east Asia.

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 728030 (EURASTiP). This output reflects the views only of the author(s), and the European Union cannot be held responsible for any use which may be made of the information contained therein.

EURASTiP – Promoting Multi-Stakeholder Contributions to International Cooperation on Sustainable Solutions for Aquaculture Development in South-East Asia

Why?

To develop strategic partnerships, increase collaboration and learn from each other by sharing of knowledge and research experience between European & south-east Asian research organisations.

Who?

Both academic researchers (associated with public or private research institutes or universities) as well as industry representatives with a research task are encouraged to take part.

How long for?

The duration of each exchange stay is a minimum of two weeks (10 working days). The candidate is encouraged to stay longer if this could benefit the achievement of the exchange goals but EURASTiP is not able to reimburse more than the notified bursary per individual for this exchange programme.

Funding?

The candidate receives a lump sum of €3000 to cover travel and subsistence costs of the planned exchange. EURASTiP is not able to reimburse other expenses, such as personnel costs. Half (€1500) of the bursary will be reimbursed upon receipt of the flight ticket invoice and proof of residence near the host facility. The other half (€1500) will be reimbursed after the acceptance of all documents upon the candidate's return as outlined below.

Selection criteria

South-east Asian candidates:

Aquaculture researchers from all south-east Asian countries including Bangladesh can apply.

Priority will be given to Thailand, Vietnam and Bangladesh (as the pilot countries of the EURASTiP project), in return a commitment is asked of the institute or company seeking funding to apply for membership of the respective National Pilot Platform (<http://eurastip.eu/platforms/asia>). Additionally, priority will be given to south-east Asian applicants affiliated with organisations who are a member of ASEAN-FEN¹ (<http://aseanfen.com/members>).

European candidates:

Aquaculture researchers from all European countries can apply, however, first allocation of places will be given to applicants affiliated with organisations who are a member of the European Aquaculture Technology and Innovation Platform (EATiP) (<http://www.eatip.eu/Default.asp?SHORTCUT=285>), including EATiP member organisations and Mirror Platforms (European Aquaculture Clusters). In case of oversubscription, the

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 728030 (EURASTiP). EURASTiP – Promoting Multi-Stakeholder Contributions to International Cooperation on Sustainable Solutions for Aquaculture Development in South-East Asia

European aquaculture clusters that have signed the EATiP Mirror Platform accession documents will be given priority.

All candidates for the research exchange programme need to be employed by:

- Research institutes
- Universities
- Private companies with a research department

All levels can apply:

- Academic researchers PhD, Masters, Bachelor, technicians
- Industry representatives: CEO's, Senior managers, Technical staff and apprentices

Host:

The host organisation should either be located in Europe (to host south-east Asian candidates) or in one of the south-east Asian countries including Bangladesh (to host European candidates).

The host should be a:

- Research institute
- University
- Private company with a research department

The EURASTiP network can facilitate in matchmaking (upon specific request) during the preparatory phase of the application.

English:

Applicants should have a good standard of English Language. The applicant's English proficiency will be verified by means of a Skype meeting as part of the selection procedure.

The host institute/company should either have an overall sufficient English proficiency or a designated translator available throughout the candidate's stay. The local situation should be specified in each application.

How to apply?

The lead applicant is considered to be the person who will be participating directly in the exchange and visiting the host. The lead applicant is responsible for all communications directly related to the exchange. The lead applicants should ensure that the application documents are completed fully with a good standard of English Language.

The leading applicant needs to prepare the following documents to apply:

- A signed agreement:

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 728030 (EURASTiP). This output reflects the views only of the author(s), and the European Union cannot be held responsible for any use which may be made of the information contained therein.

EURASTiP – Promoting Multi-Stakeholder Contributions to International Cooperation on Sustainable Solutions for Aquaculture Development in South-East Asia

Applications require a joint bid from one European and one south-east Asian organization. This means that at the time of submitting an application, the lead applicant needs a signed agreement of both the host (= the organisation where the candidate will work during the exchange) as the sending institute (= organisation where the leading applicant is employed). You can download a model form at www.EURASTiP.EU/exchanges.

- A detailed CV of the leading applicant, including organisation details of the sending institute
- An Exchange Plan, including:
 - o Foreseen timing and duration of stay. If you do not have specific dates in mind, fill in most likely dates. These can be changed later
 - o Host organisation (name and brief description)
 - o Planned activities at the host facility
 - o Exchange goal(s) and expected outcomes
 - o Capacity building potential
 - o Suggestions for additional funding possibilities and/or long-term sustainability (optional). This information is very much appreciated within the broader EURASTiP project to map alternative funding possibilities for cooperation between Europe and south-east Asia.
 - o Information about previous collaborations between the two organisations. This information helps the Selection Panel to determine the priority that should be accorded to the application under the EC contract guidance on promoting new collaborations, strengthen existing collaboration and ensuring widest possible access.
- A 1-page motivation letter in which the candidate explains how the planned exchange would fit in the EURASTiP project and aims.
- Optional: A signed mutual confidential disclosure agreement. A model agreement can be downloaded at www.EURASTiP.EU/exchanges

Applications need to be completed online, please note that only applications sent via the online submission portal will be accepted (so please do not send applications to the contact email).
