

SCIENTIST (H/F/X)

ANIMAL BIOLOGY, AGRONOMY, VETERINARY AQUATIC RESOURCES MANAGEMENT AND AQUACULTURE UNIT

**START DATE: 15 JANUARY 2024 | DEADLINE: 5 JANUARY
2024**

The University of Liège is an accomplished research institution with more than 3500 researchers and over 2000 doctoral students active across all disciplines: humanities and social sciences, life sciences, health sciences, and medicine. Researchers at ULiège have many opportunities to expand their networks and connections.

Moreover, ULiège welcomes every year numerous researchers, national as well as foreign researchers thanks to the EURAXESS contact center. ULiège seeks to be an attractive research institution by improving working conditions for researchers using the HR Strategy for Researchers (HRS4R), creating an inclusive and supportive research environment through the free of charge assistance mechanism offered to incoming researchers and their families or providing conditions for open, transparent, and merit-based recruitment of research positions.

For more details about what ULiège can offer you as a foreign researcher, please see https://www.recherche.uliege.be/cms/c_9281209/en/mobilite-euraxess or contact: euraxess@uliege.be.

ABOUT THE PROJECT

The Aquatic Resource Management and Aquaculture Research Unit is looking for a Master's-level scientist in biology, agronomy or veterinary science to work as a research associate on the Wallicrevtte FEAMPA project.

The Wallicrevette - FEAMPA research project (Development of shrimp farming with a view to diversifying aquaculture production in the Walloon Region (WalliCrevette)) aims to develop shrimp farming in the Walloon Region in order to meet market demand and increase regional aquaculture production through diversification while using innovative technologies, such as Biofloc technology and aquaponics, coupled with a water recirculation system.

JOB DESCRIPTION

Your role will be as a research associate, supervising the smooth running and carrying out of experiments in connection with the POLYRAS Interreg project.

SPECIFIC DUTIES & ACTIVITIES

- ▶ Provide overall monitoring and liaison between the various project partners ...
- ▶ Carry out experimental design and extensive bibliographical research in relation to the project
- ▶ Carry out research into the shrimp culture in RAS and biofloc systems
- ▶ Monitor the experiments on a daily basis
- ▶ Helping to supervise PhD and dissertation students
- ▶ Monitoring, recording, encoding and analysing data and drafting relevant publications (scientific reports and articles)
- ▶ Disseminate the results (in French and English) at regional and international level, at meetings of the monitoring committee and at international scientific conferences

YOUR PROFILE

- **Required skills:**
 - ▶ Skills in aquatic animal biology
 - ▶ Skills in laboratory analysis techniques (Elisa test, PCR, water physico-chemistry)
 - ▶ Water physico-chemistry skills
 - ▶ Statistical data processing skills
- **Desirable skills:**
 - ▶ Experience in animal husbandry (fish, shellfish)
 - ▶ Microbiology skills
 - ▶ Good writing skills in French and English
 - ▶ Technical skills are an asset
- **Soft skills:**
 - ▶ Ability to work as part of a research team
 - ▶ Strong organisational skills
 - ▶ Flexibility and autonomy
 - ▶ Adaptability
- **Languages:**
 - ▶ French : Oral and Written : excellent
 - ▶ English : Oral and written : fairly good to good

EMPLOYMENT TERMS

- ▶ Type of contract: *CDD*
- ▶ Length of contract : 3 years
- ▶ Start date : 15 January 24

OUR OFFER

Basic gross monthly salary for full-time work: 3964 euros (echelle 102S)
